

You know you need to protect yourself from carbon monoxide. But an alarm that doesn't work is just as deadly.

- **Threat** – Carbon monoxide is a silent killer that poses a risk you can't ignore.
- **Protection** – A working alarm is essential to protect your family from possible sources of deadly carbon monoxide including appliances, fireplaces or a car running in the garage.
- **Peace of mind** – Expert dealer installation and guidance give you confidence that your alarm is working properly.

Carbon monoxide can enter the home from many sources.

Even with the garage door open, an idling car can be lethal.

Gas appliances are often overlooked as potential threats.

Regular maintenance of equipment can keep you safe from CO.

CARBON MONOXIDE IS A KILLER.

Carbon monoxide (CO) is the most commonly encountered poison in your home. CO is the unwanted by-product of the combustion of fuels such as gas, oil and wood. Dangers can result from faulty operation or ventilation of fireplaces, a car running in the garage, ranges, grills, dryers and other gas appliances. Making matters worse, many people confuse carbon monoxide poisoning with flu symptoms and fail to get the assistance they need. This can be a deadly mistake. The good news is you can take control of your home and protect your family from the dangers of CO with the Aprilaire® Carbon Monoxide Alarm.

NON-FUNCTIONING CO ALARMS CAN BE DEADLY.

Many people are aware of the dangers of carbon monoxide poisoning.

Unfortunately, some of these same people are unaware they have CO alarms in their homes that have stopped working. All CO alarms have a limited life. To help keep you protected, the Aprilaire CO Alarm actually informs you when it's working and when you need to replace it.

AN ALARM YOU CAN TRUST FROM A NAME YOU CAN TRUST.

The Aprilaire CO Alarm is brought to you by the leader in indoor air comfort and it's only available from a qualified Aprilaire dealer. Why? Because there's more to installing a CO alarm than plugging it in. The correct height and locations in your home are essential to your safety. And to ensure even greater safety, the Aprilaire CO Alarm contains the most advanced electrochemical sensor on the market, meets new U.L.® standards and comes with a five-year warranty.

If you want as much protection as possible from the dangers of carbon monoxide, you need professionally installed Aprilaire CO Alarms on every level of your home.
